Program Fact Sheet

updated as of 6/30/19

## Crowding

The Bureau of Prisons ended FY2018 with 3,901 fewer inmates than the prior year. This is the fifth consecutive year of decreases in the inmate population after 34 years of increases. However, the Bureau remains crowded in high, medium and low security facilities.

## Residential Reentry

The BOP contracts with Residential Reentry Centers (RRCs), also known as halfway houses, to provide assistance to inmates who are nearing release. RRCs help inmates gradually rebuild their ties to the community and facilitate readjustment. Approximately 17-19 months prior to an inmate's release, an RRC referral recommendation is made based on risk factors such as programming and treatment needs. Higher risk offenders are the Bureau's first priority. Home detention monitoring is done by either the RRC or via the Federal Location Monitoring Program with US Probation. An inmate's length of placement could be up to 12 months.

RRC Locations:	205
Work Release Locations:	25
Monitoring via Federal Probation Contract:	143
RRC Average Stay:	143 days

## Mental Health Care Levels

Mental health care levels (of which there are four) are used to classify inmates based on their need for mental health services. Facility placement ranges from Care Level 1 facilities - which are for inmates who do not require significant mental health care - to Care Level 4 facilities for inmates who require inpatient psychiatric care.
