MEMORANDUM FOR CHIEF EXECUTIVE OFFICERS

FROM:  Andre Matevousian, Assistant Director
Correctional Programs Division

SUBJECT: COVID-19 Target Population Levels
Minimum and Low Security Institutions

The COVID-19 pandemic has adversely impacted a number of Minimum and Low security level institutions. CDC guidelines and population studies note an increase in positive cases where populations are unable to socially distance themselves to mitigate exposure risk. Therefore, new population levels in Minimum and Low security institutions have been established.

These population levels are a temporary measure to ensure the safety of inmates and staff. They will be put in place immediately and re-assessed at a later date. Specialized DFCLs (nationally recognized programs) are not affected by this change. Housing Units should not be vacated and closed due to these new guidelines.

See the attached COVID-19 Target Population Charts for bed space allowances.

If you have any questions, please contact David Brewer, Acting Senior Deputy Assistant Director, Correctional Programs Division.
