The Count represents the number of guilty findings in the Serious Assault Category (101) that had staff as victims of the assault. This data comes from the Chronological Disciplinary Record (CDR). The data with a victim identifier used here was not available until March of 1997, so that is as far back as this display can go.

**Cautionary Note: because the time period between the occurrence of an incident and the outcome of the hearing is often greater than one month, and because of the availability of the data, these displays will not necessarily be complete when looking at the most recent months.** Therefore, every monthly update of this data involves going back over the previous 12 months and updating them as needed. For example, January data will be collected in January and continuously updated each month for the next eleven months. The December update will have the final version of January data.
