

FOIA #2016-05022

Monthly information was requested, however the data set used for the response which has the necessary information included, only has monthly data going back 2 years. Therefore, quarterly time points were used, starting with December 2011.

The tables that follow show BOP inmates and their mental health care levels (availability for designated inmate only). The tables are separated by whether the inmate was in a restrictive housing setting or not. Aggregate data on mental illness diagnoses is not readily available, nor usable for questions asking about an inmate's mental health at a given point in time, so the BOP uses the proxy of Mental Health Care Levels, which are an indication of how much mental health care/intervention an inmate needs. The care level descriptions are provided below.

Care Level Descriptions

Mental Health Care Levels established by the Bureau are as follows:

Level 1—no significant mental health care

Level 2—routine outpatient mental health care or crisis-oriented mental health care

Level 3—enhanced outpatient mental health care or residential mental health care

Level 4—inpatient psychiatric care

Restrictive Housing Data

We are providing the data for those inmates that are housed in restrictive housing: Special Housing Units (SHU); Special Management Units (SMU), offer a four-phase program for inmates who present heightened security concerns due to their history of violent prison misconduct and/or gang activity and the United States Penitentiary (USP) Administrative Maximum (ADX), in Florence, Colorado, which houses inmates who require the tightest controls and supervision because of the nature of their offense or their demonstrated behavior while in prison.
