DOCTORAL PSYCHOLOGY INTERNSHIP PROGRAM
2020 - 2021

Accredited by the
American Psychological Association

Member, Association of Psychology
Postdoctoral and Internship Centers (APPIC)

Note to all applicants: This internship site agrees to abide by the APPIC policy that no person at this training facility will solicit, accept, or use any ranking-related information from any intern applicant.

Revised July 2019

OVERVIEW OF FMC DEVENS AND THE INMATE POPULATION

FMC Devens is one of 122 institutions in the Federal Bureau of Prisons (BOP), an agency that houses more than 100,000 inmates nationwide. With a staff of over 400, FMC Devens took its first inmates in January 1999, and has been expanding in population and scope of services ever since. The institution currently has a capacity of over 1,000 inmates.

FMC Devens is one of seven federal medical centers in the BOP; our facility receives a large number of psychiatric and medical referrals from other BOP institutions. Inmates with chronic medical conditions, such as renal failure, HIV, paralysis, and cancer, are housed and treated at FMC Devens. While most inmates with medical problems are housed in outpatient units, the institution also houses a small inpatient medical population. The institution has its own dialysis treatment area. FMC Devens was the first BOP facility to provide donor transplant services, and the program serves as a model for other facilities. FMC Devens is accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) in three areas: ambulatory care, long-term care, and behavioral health.

The Mental Health Unit, which houses inmates with both chronic and acute psychiatric problems, consists of two locked and two unlocked units. This unit houses both sentenced inmates referred for mental health treatment and inmates civilly committed by the courts as mentally ill and dangerous. The Mental Health Unit also houses defendants who are referred by the courts for forensic evaluation. These pretrial defendants are assessed to determine competency to stand trial, mental state at the time of their offense, or other issues as requested by the courts.

Because of unique programming offered at FMC Devens, sex offenders make up approximately 40% of our inmate population. Inmates with a history of sexual offending at this institution are automatically enrolled in the Sex Offender Management Program (SOMP). This mandatory program assignment is for sex offenders who are ineligible or who do not volunteer for the residential treatment program. SOMP is designed to evaluate risk of sexual re-offense and associated management needs, and to provide and/or recommend appropriate management services during incarceration and upon release to the community. Our other sex offender-specific program is the residential Sex Offender Treatment Program (SOTP-R). The SOTP-R is a voluntary, intensive, residential therapeutic program for higher risk male sex offenders serving time in the Bureau of Prisons. This residential treatment program, one of two in the BOP, employs a wide range of cognitive-behavioral and relapse prevention techniques to treat and manage sexual offenders.

In addition to the aforementioned specialty populations, FMC Devens houses a number of general population inmates who do not have such specialized treatment needs. Psychology programming is also available for these inmates. General population inmates may participate in individual and group therapy and self-help programs. In addition, for the substantial number of inmates who have substance abuse problems, FMC Devens offers comprehensive drug treatment programs, including drug education classes and a Non-Residential Drug Abuse Program (NR-DAP).
PSYCHOLOGY SERVICES

The Psychology Services Department at FMC Devens currently consists of 16 doctoral-level psychologists, five masters-level clinicians, three psychology interns, a psychology technician, and one secretary. We also typically train practicum students during the traditional school year. The Psychology Department is responsible for, among other things, the Drug Abuse Program, the Sex Offender Management and Treatment Programs, the Forensic Evaluation Service, the Suicide Prevention Program, and the Employee Assistance Program. Psychology staff members provide individual and group psychotherapy to inmates, conduct suicide risk assessments, intervene in crisis situations, assess and screen inmates’ mental status upon arrival and while in segregation, and consult with other institutional staff members. Furthermore, psychologists play a vital role in assisting institution crisis teams, such as the Crisis Negotiation Team and the Crisis Support Team.

At FMC Devens, the Psychology Department is housed in a centralized area with an ample supply of office space. Staff members working in the Sex Offender Treatment Program have offices on the residential treatment-housing unit. The Psychology Department’s administrative support staff (one of whom works solely for sex offender programming needs) are available to interns, as well as to other members of the department. Each member of the Psychology Department has his or her own office, a computer, and access to various computer programs such as GroupWise for e-mail access, the Bureau Electronic Medical Records System and Psychology Data System for electronic clinical documentation, and Microsoft Office products.

Interns have their own offices and computers, as well as access to the computer programs as previously mentioned. Interns can also use the Department’s fax machine and photocopier. The Psychology Department also has several rooms available for group therapy, testing, and individual clinical contacts. Additionally, the department has two conference rooms where didactic presentations and staff meetings are held. There is a professional library in one conference room.

Following is a list and description of the psychologists currently working at FMC Devens:

**Paul Anderson, Psy.D., ABPP – Chief Psychologist**
Dr. Anderson received his doctorate in Clinical Psychology from Indiana University of Pennsylvania in 1996. He completed a doctoral internship at the Federal Correctional Institution in Morgantown, West Virginia, and completed his postdoctoral training in Correctional Psychology for the state of New Hampshire. Prior to coming to FMC Devens, he worked at a psychiatric inpatient unit and for a community mental health agency. His interests include clinical supervision, treatment of personality disorders, and an integrative approach to psychotherapy. He was the Director of Clinical Training at this site from 2000 until becoming Chief Psychologist in 2006. Dr. Anderson is licensed in Massachusetts.

**Alexis Bowles, Psy.D. – Sex Offender Program Psychologist**
Dr. Bowles graduated from Pepperdine University in 2012 with a Psy.D. in Clinical Psychology. She completed her doctoral internship and her postdoctoral fellowship in the Sex Offender Management Program at FMC Devens; and in 2014, she was employed as a Sex Offender
Program Specialist. In May 2015, she obtained the position of Sex Offender Program Psychologist. Her interests include empirically-based treatments in a correctional setting, static and dynamic risk factors for sexual recidivism, and modified therapeutic communities for sex offenders.

Shawn Channell, Ph.D., ABPP – Forensic Psychologist
Dr. Channell graduated from Western Michigan University with a Ph.D. in Clinical Psychology in 1999. He completed his doctoral internship at the Federal Medical Center in Rochester, MN. Prior to transferring to FMC Devens, he worked at the Metropolitan Correctional Center in San Diego, CA, and the Federal Correctional Institution in Waseca, MN. His interests include law and mental health, psychological assessment, malingering, and risk assessment of violence. Dr. Channell is licensed in Massachusetts and is board certified in Forensic Psychology.

Brett A. Dodd Jr., Psy.D. – Mental Health Unit Psychologist
Dr. Dodd received his undergraduate education at Norfolk State University (an HBCU) and his Psy.D in Clinical Psychology from Regent University in 2015. After practicum placements in various Virginia state prisons, he began his BOP career as a doctoral intern at the Federal Medical Center in Lexington, KY. He then worked as a Staff Psychologist at the Federal Correctional Institute in Cumberland, MD for over three years prior to joining FMC Devens in late 2018. His professional interests include complex trauma, treatment of minority populations, residential treatment programing, and multicultural competency development. Dr. Dodd is licensed in Virginia.

Kelly Fricker, Psy.D. – Internship Program Coordinator
Dr. Fricker received her doctorate in Clinical Psychology from The Chicago School of Professional Psychology in 2011. She began her BOP career as a practicum student at the Metropolitan Correctional Center in Chicago and then completed her doctoral internship at the Federal Medical Center in Lexington, KY. Prior to joining FMC Devens, she worked as a Staff Psychologist at the Federal Correctional Complex in Allenwood, PA. Her interests include clinical supervision, crisis intervention, group dynamics, multicultural competency development, and self-care for correctional workers. Dr. Fricker is licensed in Illinois.

Jon Gorham, Psy.D. – Mental Health Unit Psychologist
Dr. Gorham graduated from Wheaton College with a Psy.D. in Clinical Psychology in 2010. He completed his doctoral internship in the United States Air Force, at Wright-Patterson Air Force Base Medical Center in Dayton, Ohio. He spent more than five years in the Air Force, focused on process improvement in local clinics, while providing treatment and evaluations, clinical consultation to Air Force Strategic and Wing leadership, and front-line care for troops in combat. His interests include skills training, mental health, crisis management, empirically-based treatments, and diversity dynamics impact on treatment. Dr. Gorham is licensed in New York.

Janet Howson, Psy.D. – Mental Health Unit Psychologist
Dr. Howson received her doctorate in Clinical Psychology from Widener University in Chester, Pennsylvania, in 2010. She completed her doctoral internship at the Keystone Center Extended Care Unit, a residential treatment center for sexual compulsivity and trauma. Dr. Howson began her career with the Bureau of Prisons as a Special Management Unit Psychologist at the United
Bethany Kasdon, Psy.D. – Mental Health Unit Psychologist
Dr. Kasdon graduated from the University of Denver in 2011 with her Psy.D. in Clinical Psychology. She completed her doctoral internship at FMC Devens. She began her career as a Staff Psychologist in 2012 at FCI Bennettsville, before transferring to FCC Florence. While employed at FCC Florence, Dr. Kasdon worked in the Special Management Unit and as an Administrative Maximum Psychologist. In December of 2014, she obtained the position of Mental Health Unit Psychologist at FMC Devens. Her interests include psychopathy and chronic and persistent mental illness.

Miriam Kissin, Psy.D. – Forensic Psychologist
Dr. Kissin graduated from Antioch University at New England in 2006 with a Psy.D. in Clinical Psychology. She completed her forensic track doctoral internship at New York University Medical Center/Bellevue Hospital in New York City and a forensic postdoctoral fellowship at the Law and Psychiatry Program at the University of Massachusetts Medical School in Worcester, Massachusetts. She then worked for two years at the Worcester County Adult Court Clinic as a Designated Forensic Psychologist providing court-ordered statutory evaluations. She joined FMC Devens as a Forensic Psychologist in 2009. Her areas of interest include socio-contextual factors related to violence risk assessment and personality disorders in the forensic population. Dr. Kissin is licensed in Massachusetts.

Bruce Loding, Ph.D. – Sex Offender Program Psychologist
Dr. Loding graduated from Clark University in 2006 with a Ph.D. in Clinical Psychology. He completed a doctoral internship at Community HealthLink Youth and Family Services in Worcester, Massachusetts. He completed a postdoctoral fellowship at FMC Devens in the Sex Offender Management Program. Prior to joining the Federal Bureau of Prisons in 2006, Dr. Loding worked for seven years as a therapist in a residential sex offender treatment program for juveniles. His interests include psychological testing, sex offender assessment, and sex offender treatment. Dr. Loding is licensed in Massachusetts.

Amanda McGorty, Ph.D. – Sex Offender Program Psychologist
Dr. McGorty graduated from Sam Houston State University in Huntsville, Texas in 2011 with a Ph.D. in Clinical Psychology and a concentration in Forensic Psychology. She completed her doctoral internship at FMC Devens in 2011 and then completed a postdoctoral fellowship at FMC Devens in the Sex Offender Management Program. In October 2012, she obtained the position of Sex Offender Program Psychologist. Her interests include static and dynamic risk factors for both general and sexual recidivism, group treatment of sex offenders, and the application of research findings into clinical practice.
Christie Morley, Psy.D. – Mental Health Unit Psychologist
Dr. Morley received her doctorate in Clinical Psychology from Adler University. She completed her pre-doctoral internship at the Federal Correctional Complex in Terre Haute, Indiana and was subsequently hired as a staff psychologist. While also responsible for staff psychologist duties, she largely provided treatment within the S.T.A.G.E.S. residential program, which primarily utilizes a modified DBT approach for inmates with Borderline Personality Disorder. She currently is a mental health psychologist providing treatment for inmates with severe mental illness in need of inpatient treatment. Her interest include trauma-informed treatment, treatment of personality disorders and DBT treatment, and crisis intervention. Dr. Morley is licensed in Indiana.

Claudia Osorio, Psy.D. - Sex Offender Program Psychologist
Dr. Osorio received her doctorate in Clinical Psychology from Albizu University in 2016. She completed a practicum rotation at the Federal Correctional Institution in Miami, Florida, and then completed her doctoral internship at the Federal Medical Center (FMC) in Devens, Massachusetts. Prior to returning to FMC Devens as a Sex Offender Program Psychologist, she completed her postdoctoral training at the Massachusetts Treatment Center, Sex Offender Treatment Program. Some of her clinical interests include treatment of minority populations, assessment and treatment of sex offenders, juvenile delinquent behavior, and the role of family dynamics in offender behavior. Dr. Osorio is licensed in Massachusetts.

Marilyn Park, Psy.D. – Drug Abuse Program Coordinator
Dr. Park graduated from the University of Denver in 2005 with a Psy.D. in Clinical Psychology. She completed her doctoral internship training at the Federal Medical Center in Devens, Massachusetts. Dr. Park began her career in the BOP in September 2005 as a Staff Psychologist at the Federal Medical Center in Phoenix, Arizona. In December 2012, Dr. Park obtained a position as the Drug Abuse Program Coordinator (DAPC) at the Federal Medical Center in Devens, Massachusetts. Currently as the DAPC, she is responsible for coordinating drug treatment programs, including the Non-Residential Drug Abuse Program, drug education classes, and qualification for the Residential Drug Abuse Program. Her professional interests include drug treatment and multicultural/diversity/anti-racism training in professional psychology. Dr. Park is licensed in Illinois.

Cheryl A. Renaud, Ph.D. – Sex Offender Management Program and Sex Offender Treatment Program Coordinator
Dr. Renaud graduated from the University of New Brunswick, New Brunswick, Canada, in 2000, with a Ph.D. in Clinical Psychology. She completed her doctoral internship at FMC Rochester, Minnesota. She then worked for three years as a staff psychologist in the Sex Offender Treatment Program at FCI Butner, North Carolina. She transferred to FMC Devens in 2003, to design, implement, and coordinate the BOP’s first comprehensive Sex Offender Management Program. In August of 2007, she was made the Sex Offender Treatment Program Coordinator, tasked with developing and coordinating that program as well. Prior to joining the BOP, she worked with sex offenders incarcerated in Correctional Services Canada, and in community settings. Dr. Renaud has published several peer-reviewed articles on various aspects of human sexuality and continues to be involved in research on sexual violence.
**Ericka Rice-Aquino, Psy.D. – Sex Offender Program Psychologist**

Dr. Aquino graduated from Carlos Albizu University in Miami, Florida in 2008 with a Psy.D. in Clinical Psychology and a concentration in Forensic Psychology. She completed her doctoral internship on the Forensic Unit at Westborough State Hospital in Massachusetts and then began a postdoctoral fellowship at FMC Devens in the Sex Offender Management Program in 2009. In February 2010, she obtained the position of Sex Offender Program Psychologist. Her interests include forensic assessment of sex offenders, personality factors predicting sexual recidivism, and group treatment of sex offenders. Dr. Aquino is licensed in Massachusetts.

In addition to these permanent staff positions, Psychology Services has two postdoctoral fellow positions assigned to the Sex Offender Treatment and Management Programs. The fellows may contribute to the internship program by presenting didactics, co-leading therapy groups, and providing collateral supervision and mentoring to the interns.
PSYCHOLOGY DOCTORAL INTERNSHIP PROGRAM

**Accreditation.** The internship program at FMC Devens formally began with the arrival of the 2000-2001 intern class. All of our interns have been matched with our program through the Association of Psychology Postdoctoral and Internship Centers (APPIC) match process. We became members of APPIC in May 2001 and maintain our membership status. Our program has been accredited by the American Psychological Association (APA) since March 2003. Our most recent site visit was in 2014 and resulted in the continued accreditation of our program. The address and telephone number of APA’s Commission on Accreditation is:

750 First Street, NE
Washington, D.C. 20002-4242
(202) 336-5979
(202) 336-6123 TDD

**Training Model, Aims, and Competencies.** The overall aim of the doctoral internship program is to produce entry-level professional psychologists who can also function competently in a correctional environment. Our belief is that this is most effectively accomplished by emphasizing direct service experiences. As a result, the training model adopted for the FMC Devens internship program is the Practitioner-Scholar model.

Interns at FMC Devens can be expected to build upon and be evaluated on the following the following professional competencies:

1. **Research:** The intern will demonstrate knowledge, skills, and competence sufficient to produce new knowledge, to critically evaluate and use existing knowledge to solve problems, and to disseminate research.
2. **Ethical and Legal Standards:** The intern is expected to respond professionally in increasingly complex situations with a greater degree of independence.
3. **Individual and Cultural Diversity:** The intern will develop the ability to conduct all professional activities with sensitivity to human diversity, including the ability to deliver high quality services to an increasingly diverse population.
4. **Professional Values, Attitudes, and Behaviors:** The intern will demonstrate a commitment to professional growth and development and respond professionally in increasingly complex situations with a greater degree of independence across levels of training.
5. **Communication and Interpersonal Skills:** The intern will demonstrate and display professional communication and interpersonal skills in increasingly complex situations and understands that professional communication and interpersonal skills are foundational to education, training, and practice in health service psychology.
6. **Assessment:** The intern will demonstrate competence in conducting evidence-based assessment consistent with the scope of Health Service Psychology.
7. **Intervention:** The intern will demonstrate competence in evidence-based interventions consistent with the scope of Health Service Psychology.
8. **Supervision:** The intern will demonstrate knowledge of supervision as grounded in science and integral to the activities of health service psychology through direct or simulated practice.
9. **Consultation and Interprofessional/Interdisciplinary Skills:** The intern will demonstrate proficiency in the intentional collaboration of professionals in health services psychology with other individuals or groups to address a problem, seek or share knowledge, or promote effectiveness in professional activities.

Through the combination of individual and group supervision, experiential learning elements (e.g. direct provision of mental health services), and educational activities (e.g. didactic presentations, assigned readings), interns will gain knowledge and skills in the above-listed areas within a correctional environment. We believe that exposure to a correctional facility and our inmate population will make interns well trained for continued work within a prison setting. However, we tailor our training sufficiently broad so interns are well suited for work in a wide-variety of clinical settings.

The program is designed to be a 12-month, 40-hour per week experience for all interns. Consistent with the Practitioner-Scholar model, the majority of training here is experience-based. Training experiences proceed in a sequential, cumulative, and graded manner. At the beginning of the training year, interns observe supervisors’ work and provide services jointly with a supervisor. However, as interns feel more comfortable and display increased competence, they are able to work more independently. Also, during each rotation, interns work toward more autonomous practice as the rotation progresses.

Interns learn experientially by providing a variety of psychological services to several subsets of inmates throughout the training year and directly working with staff in other disciplines within this correctional environment. Although the inmate population consists entirely of incarcerated adult males, there are several distinct facets of that population, all of which require specific skills and knowledge. Furthermore, the inmate population is very diverse in terms of as ethnicity, culture, age, religion, education, and socioeconomic status. Interns at FMC Devens complete rotations that specifically emphasize the unique client populations housed at this institution.

**Rotations.** Interns train in all five areas of the Psychology Services Department: General Population/ Individual Therapy, Drug Abuse Programming, Sex Offender Programming, Treatment of Severe Mental Illness, and Forensic Evaluation. The General Population training occurs throughout the training year. Simultaneously, the training year is split into thirds, allowing interns to complete rotations within all areas of the department. Two rotations will be “major,” or full-time, and two rotations will occur as “minor,” or part-time. Interns’ training goals and preferences are considered in selection and assignment of minor and major rotations. The table below is a sample rotation schedule.
Descriptions of the rotations follow:

**Drug Abuse Programming (DAP)**
The Drug Abuse Program rotation involves co-facilitation of one Non-Residential Drug Abuse group, co-facilitation of one Drug Education Group, and participating in eligibility interviews for the Residential Drug Abuse Program (RDAP). Interns will initially observe drug treatment staff with various groups and classes, and they are later expected to actively co-facilitate the drug treatment groups. Interns are expected to learn and sharpen their DSM-V diagnostic skills for various addiction-related diagnoses when conducting qualification interviews for RDAP. The rotation will also include learning about the BOP’s structure of Drug Abuse Programs and interns are expected to be familiar with policy statements regarding drug treatment in the BOP. Finally, interns will evidence advanced skill in motivational interviewing techniques and rational

self-analysis (empirically supported treatment models for BOP drug programming). The DAP rotation is always a minor rotation.

Learning elements for this rotation include:
1.) Co-facilitating one Non-Residential Drug Abuse Program group
2.) Facilitating one drug education class.
3.) Using the DSM-5 to sharpen diagnostic skills for various addiction-related diagnoses.
4.) Understanding and using BOP structure and policies for drug abuse programming.
5.) Practicing motivational interviewing and cognitive behavioral techniques with an incarcerated population of inmates who have a history of substance addiction in a group setting.

Severe Mental Illness: Treatment and Management (SMI)
In this rotation, interns work with sentenced and civilly committed inmates who have been diagnosed with severe and persistent mental illness and who are residing in both the inpatient and outpatient wings of the Mental Health Unit. Interns assigned to this rotation attend multidisciplinary treatment team meetings, carry an individual therapy caseload, provide crisis intervention services, and complete evaluations on inmates referred by members of the treatment team. The intern has the opportunity to perform diagnostic interviews and conduct psychological testing for those inmates who are transferred to FMC Devens for stabilization and treatment.

Consistent with our training model, experiences on the SMI rotation proceed in a progressive “step-wise” manner. For example, our interns may initially observe supervisory staff consult with fellow staff members, conduct rounds, perform intake interviews, and engage in crisis intervention. Interns subsequently perform these functions in the presence of supervisory staff. After observing, receiving live supervision, and demonstrating appropriate ability in assessing inmates’ mental status and in conducting intakes and rounds, interns are able to engage in these activities without live supervision. The intern and supervisor identify the intern’s experience level collaboratively. Interns continue to receive live supervision while consulting with fellow staff members and providing crisis intervention services, as supervisory staff generally remain present during these activities throughout the rotation.

Learning elements for this rotation include, but are not limited to,
1.) Understanding and using BOP structure and policies for management and treatment of inmates with mental illnesses.
2.) Completing at least one intake interview and intake report for an inmate with a severe and persistent mental illness.
3.) Conducting and writing at least one mental status exam on an inmate with impaired mental status.
4.) Conducting at least one diagnostic interview and arrive at an accurate DSM-5 diagnostic profile (particularly with regard to psychotic, mood, and personality disorders).
5.) Providing at least one crisis intervention during a mild to moderate inmate crisis.
6.) Completing at least one suicide risk assessment on an inmate with severe mental illness, per BOP “good practice” standards.
7.) Using an evidence-based treatment modality for groups, develop that modality into a group format, and independently facilitate a group.
Providing treatment to a small caseload of severely mentally ill inmates.

Forensic Evaluation Services
Forensic Evaluation Services at FMC Devens is comprised of two primary components. First, this institution is a forensic study site for federal courts. As a result, we receive referrals from all parts of the United States to perform evaluations of insanity, trial competency, risk of dangerousness, and sentencing issues. Second, Forensic Evaluation Services oversees the institution’s Risk Assessment Panel. The Risk Assessment Panel reviews mentally ill patients who have been committed as a result of dangerousness to determine their appropriateness for release. In addition, the Risk Assessment Panel reviews all convicted mentally ill inmates designated to FMC Devens prior to their release for potential civil commitment due to mental illness and dangerousness.

Interns participate in all aspects of the forensic evaluation program. Interns learn about the court-ordered evaluation process by conducting interviews with defendants under supervision, gathering collateral information, and conducting psychological testing. Interns have the opportunity to learn about and use specialized forensic measures such as malingering tests and competency assessment instruments. Interns gradually assume a more active role in the evaluation process and have the opportunity to co-write forensic reports with their supervisors. Because forensic clinicians often testify from the institution via videoconference connections with various federal courts, interns may have the opportunity to observe expert testimony. They may also accompany one of the forensic examiners to one of the nearby federal district courts to observe live testimony. As co-signers of the forensic reports, interns are also subject to subpoena and may have the opportunity to testify in court. After completing the Forensic Evaluation rotation, each intern has the opportunity to testify as an expert witness in a “mock trial” exercise as part of the didactic series. Interns in this rotation also present cases to the Risk Assessment Panel and co-author risk assessment panel reports for the courts.

Learning elements for this rotation include:
1.) Becoming familiar with federal legal standards and statutes referencing the referral question.
2.) Becoming familiar with BOP policies and procedures for forensic evaluation services.
3.) Becoming familiar with administration and scoring of several psychological tests.
4.) Completing at least three forensic reports, which could include U.S.C. 4241, 4242, 4243, 4244, or 4246 evaluations.
5.) Coordinating psychological testing as directed by the primary supervisor.
6.) Completing assigned readings designated by the primary supervisor.
7.) Participating as an expert witness in a mock trial. Testimony will be provided in relation to a report completed by the intern during the forensic rotation.
8.) The intern may have an opportunity to accompany a forensic psychologist to court to observe the psychologist in the role of expert witness.

Sex Offender Treatment & Management
In March 2004, FMC Devens implemented the Sex Offender Management Program (SOMP), the first program of its kind in the Bureau of Prisons, which serves as the model for sex offender management services throughout the BOP. The SOMP is a mandatory program assignment for
approximately 300 sex offenders at FMC Devens. The residential Sex Offender Treatment Program (SOTP-R), an intensive residential treatment program for approximately 112 sex offenders, was established at FMC Devens in August 2007. This voluntary program employs a wide range of cognitive-behavioral and relapse prevention techniques to treat and manage sexual offenders in the context of a modified therapeutic community. The primary goal of both the SOTP-R and the SOMP is to help offenders manage their sexual deviance in order to reduce recidivism. The programs adhere to the notion that, while there is probably no permanent cure for paraphilic disorders, criminal sexual behavior can be effectively managed in most cases through competent treatment and intensive supervision.

As a major rotation, interns participate in all aspects of the SOTP-R and SOMP. SOTP-R learning opportunities include psychosexual and sex offender risk assessments, clinical management of a caseload of inmates (e.g., make appropriate treatment and supervision recommendations, monitor the inmate’s exposure to sexual risk factors and adherence to institutional rules), and active involvement in various available treatment services (e.g., group therapy, psycho-education). As a minor rotation, interns will primarily learn about and develop skills relevant to the SOMP (e.g., intakes, sex offender-specific risk assessment, intervening when an inmate has sexually inappropriate materials, etc.). The rotation provides the intern with a unique training opportunity to develop specialized diagnostic, assessment, intervention, and consultation skills with a diverse population of sex offenders.

Learning elements for this rotation are:

1.) Conducting at least one thorough psychosexual evaluation clinical interview and then complete the comprehensive psychosexual report.
2.) Accurately diagnosing paraphilic disorders using the DSM-5.
3.) Accurately scoring and interpreting sex offender-specific risk assessments.
4.) Using and interpreting sex offender specific measures.
5.) Identifying risk-relevant materials for individual sex offender caseload.
6.) Becoming familiar with sex offender-specific process groups and psycho-educational groups.
7.) Recognizing and demonstrating sex offender-specific and sex offender-appropriate interventions.
8.) Understanding and using BOP structure and policies for sex offender programming.

**General Population: Treatment & Assessment**

At FMC Devens, most inmates live within the general population (i.e., in general housing units and not treatment units). In the interest of providing a broad, generalist psychology experience, beyond the special treatment populations at FMC Devens, interns master a variety of skills regarding general population inmates. This work also creates an opportunity to learn BOP-wide policy, as it applies to psychologists. Although the general population inmates typically do not suffer from debilitating mental health problems, some may be diagnosed with mood, anxiety, psychotic, and personality disorders. Others may seek psychological assistance to deal with adjustment issues, family problems, behavioral health concerns, or situational crises.

Throughout the entire year, interns rotate being “on call” during which time they respond to immediate requests for psychology services, during regular business hours only. These
opportunities often include, but are not limited to, screenings (intakes, protective custody, hunger strike, etc.), crisis intervention, suicide risk assessment, mental health triage, completing rounds in segregated housing, attending various meetings, and grief counseling.

In addition, interns carry a long-term individual therapy caseload throughout the year. Typically, this caseload is comprised of three inmates from the general population or mental health units. Also, interns facilitate, or co-facilitate, group therapy for general population inmates. While there is some flexibility in which groups are offered, we emphasize evidence-based practices (i.e., cognitive skills, criminal thinking, anger management, emotional regulation).

Interns also may provide psycho-educational material at inmate health fairs and other health-related classes offered at the institution. This is an opportunity for interns to be relatively creative, presenting on a series of psycho-educational topics such as sleep hygiene, self-care, behavioral medicine, managing mental illness in a correctional setting, etc.

As mentioned, internship training occurs in a sequential and graded manner; the general population rotation is no exception. Specifically, by the end of this yearlong experience with general population inmates, interns should be able to employ various empirically-supported theoretical orientations based on each inmate’s individual needs, triage mental health needs effectively, conduct thorough and well-reasoned suicide risk assessments, comfortably consult with a variety of multidisciplinary staff, and accurately document these clinical activities.

Learning elements for this rotation include:
1.) Becoming familiar with BOP policies and procedures on intake screenings, the Prison Rape Elimination Act, suicide watch, Special Housing Unit protocol, the Inmate Skills Development System, mental health care levels, confrontation avoidance, protective custody, and hunger strikes.
2.) Carrying a caseload of three to four regular, long-term therapy clients. This involves conducting an initial history, developing an empirically-supported treatment plan, providing empirically-supported therapy, regularly updating the treatment plan, and ethical termination of therapy.
3.) Providing weekly supervision to a practicum student.
4.) Facilitating or co-facilitating group therapy.
5.) Conducting and writing five suicide risk assessments using empirically-supported methods.
6.) Responding, in accordance with BOP policy, to two inmates who have reported having been sexually abused while incarcerated.
7.) Managing an inmate crisis on two occasions.
8.) Attending the Department Head Meeting, the Special Housing Unit meeting, and the Warden’s close-out/open-up meeting at least once each.
9.) Performing mental wellness checks and evaluations for inmates in Special Housing Unit.
10.) Attending the inmate meal to answer inmate questions about Psychology Services.
11.) Attending Suicide Watch Companion training at least once.
12.) Attending an inmate orientation in which a psychologist describes psychological services available at this institution on one occasion.
13.) Providing a psycho-educational class or information session to inmates on one occasion.
14.) Providing a psycho-educational training to institutional staff on one occasion.
15.) Completing at least five intake screenings.
16.) Learning how to refer an inmate to the Psychiatry Department for a psychotropic medication evaluation.
17.) Providing consultation to case managers, updating case managers about inmate progress and program compliance.

**Didactic Seminars.** Psychologists in the department provide training in weekly didactic seminars. Additionally, FMC Devens psychiatrists, other institutional staff, and psychologists from the community may be invited to participate in the didactic series. We offer two weekly didactics (90 minutes each) for all trainees and mental health staff.

Didactic subject matters include treatment and management of sex offenders, broader correctional and clinical psychology material, and mental health case law, depending on supervisor availability. Sample topics are mentioned in the Appendix. Interns are required to complete at least one clinical case presentation and one scholarly presentation during didactics. Interns may also attend seminars held by Health Services within FMC Devens. Interns have sometimes been able to attend one local workshop of their choice funded entirely by the Psychology Department.

**Other Educational Activities.** Although Health Psychology is not a formal rotation, interns do have the opportunity to work with inmates from the inpatient and outpatient medical populations. These inmates include individuals who are undergoing kidney dialysis, have significant physical limitations (e.g., require the use of a wheelchair), are HIV positive, or have some other chronic medical problem. Interns may provide individual psychotherapy, group therapy, or crisis intervention to these patients. Interns may also have the opportunity to participate in assessments of candidates for organ transplantation.

Historically, FMC Devens trains up to three doctoral level practicum students each training year. Our interns gain supervision experience by supervising a practicum student on a limited number of therapy cases. Interns may also collaborate in facilitating group supervision for all the practicum students. This training experience lasts throughout the practicum students’ time at Devens (usually September through May). As with other learning elements, supervision responsibilities increase gradually. For instance, interns may initially supervise a student on one individual therapy case, and eventually supervise on several cases and co-facilitate therapy groups with their practicum student “supervisee.” Interns receive supervision from a licensed psychologist of their experiences providing supervision to students.

In previous years, interns have been afforded the opportunity to tour other state and federal correctional and mental health facilities. Interns have also been invited to participate in training activities with the institution’s Crisis Support Team and Crisis Negotiation Team, including serving as role players during large-scale crisis negotiation exercises. Interns may assist in psychology program evaluation by participating in audit reviews of departmental adherence to regulatory and professional standards of practice. Interns also present on psychological topics to staff members at various staff meetings. Finally, interns assist in selection of new interns, by
reviewing application data, interviewing prospective candidates, and sharing their impressions with supervisory staff.

**Orientation.** At the beginning of the training year, interns attend two weeks of Introduction to Correctional Techniques, which serves as an orientation to the federal correctional system and the broader correctional environment for all new staff. The Psychology Department also conducts a week of orientation for interns, intended to introduce the procedural components, organization, and structure of the Psychology Services Department and internship program in particular.

**Supervision.** Providing high-quality supervision to interns is of the highest priority. Interns are provided with a minimum of two hours of individual supervision each week by a licensed psychologist. Additionally, interns participate in two hours of group supervision per week with the Internship Program Coordinator. Individual supervision is tailored to the needs of each person and can include review of written notes and reports, discussion of therapy cases, review of taped sessions, and live supervision of sessions. In addition to the regularly scheduled weekly supervision mentioned above, licensed psychologists are readily available for consultation and supervision as necessary.

At the beginning of the training year, rotation supervisors and interns discuss the personal goals interns may have related to their professional development. Every effort is made to provide learning experiences and relevant supervision to interns to help them achieve their desired goals and improve upon targeted competency areas. At the end of the department orientation, interns meet with the Internship Program Coordinator to plan which rotations will be full-time, which will be part-time, and the order in which each intern will complete each rotation. With only the rarest of exceptions, interns have been able to design their rotation schedule to meet their training interests and needs.

**Research Activities.** Interns who follow proper IRB procedures may be able to invite inmates to participate in research projects as subjects. Applicants should note that empirical research projects using BOP staff or inmates require formal review and approval by the agency.

**Intern Evaluation.** Formal evaluation of each intern’s performance occurs at the end of each rotation. Mid-rotation progress reports are also provided. Interns are evaluated using a tool common to all Bureau of Prisons internship training sites. The evaluation measures intern progress with regard to the following profession-wide competencies, as delineated by APA: Research; Ethical and Legal Standards; Individual and Cultural Diversity; Professional Values, Attitudes, and Behaviors; Communication and Interpersonal Skills; Assessment; Intervention; Supervision; and Consultation and Interprofessional/Interdisciplinary Skills. Supervisors complete the evaluation form and share the results with the intern.

Interns also evaluate the internship program and supervisors after each rotation and at the end of the training year and have an opportunity to discuss their comments and ratings with the Internship Program Coordinator. All feedback is shared anonymously and strongly considered when adjusting the training program.
LOCAL AREA

FMC Devens is located on the grounds of Fort Devens, a decommissioned U.S. Army base. The facility is located approximately 35 miles west of Boston, New England’s largest and best-known city. Boston, which can be reached by car or train from the Devens area, represents all of what big-city life has to offer. Boston and adjoining Cambridge house some of the finest colleges and universities in the world, including Harvard University, Massachusetts Institute of Technology (MIT), Boston College, Boston University, Northeastern University, and Tufts University. There are many fine restaurants in Boston, with a particular emphasis on Italian dining in the North End of the city and many great seafood restaurants. There are a great many entertainment options in Boston, including high-quality live theater, the world-famous Boston Pops orchestra, and the Boston Symphony. Shopping is certainly ample, with well-known shopping areas such as Faneuil Hall and Newbury Street. For sports enthusiasts, college and professional sporting events are in great abundance, with the Red Sox, Celtics, and Bruins playing in Boston and the Patriots playing in nearby Foxboro. Boston also features several impressive museums such as the Museum of Fine Arts, the Museum of Science, and the New England Aquarium.

As America’s oldest major city and site of many important events in the formation of this nation, Boston offers many interesting and famous tourist sites. Included in this list are the Old North Church, where Paul Revere began his famous ride, the site of the Battle of Bunker Hill, and the site of the Boston Massacre. All of these places are on the Freedom Trail, a walking trail through the city that highlights these and other historic locations. Closer to FMC Devens are Lexington and Concord, where the first battles of the American Revolution took place, and Walden Pond, made famous by Henry David Thoreau. Also, less than two hours from the institution are Salem, site of the famous witch trials of the 1600s, and Plymouth, where the Pilgrims established their first permanent settlement.

Worcester, the second-largest city in Massachusetts, is 26 miles south of the institution. It is the home of many fine institutions of higher learning such as Clark University, College of the Holy Cross, and the University of Massachusetts Medical School. Worcester also offers many fine dining and entertainment options. Other well-known New England cities, such as Portsmouth, New Hampshire, and Providence, Rhode Island, can be reached in little over an hour from FMC Devens, and offer much in the way of tourism, history, dining, and entertainment.

Many great recreational options are available in New England. For beach lovers, the shore is only an hour from the institution and Cape Cod is only two hours away. In addition, both Martha’s Vineyard and Nantucket can be reached by ferry from Cape Cod. The White Mountains of New Hampshire, including Mount Washington, site of the strongest recorded wind in world history, and Mount Monadnock, the most frequently-climbed mountain in North America, can be reached by car in two hours. Many outstanding skiing areas exist in northern New England, especially in Vermont, and most are within a three-hour drive. Many vacationers in search of a relaxing experience gravitate toward the Berkshire Mountains in western Massachusetts, coastal Maine, and many areas of Vermont and New Hampshire.
BENEFITS AND EMPLOYMENT OPPORTUNITIES

Salary and Benefits. Benefits for the internship include an annual stipend of $58,944 (as of 2019). Health insurance benefits are also available and will be explained during Institution Familiarization/Introduction to Correctional Techniques, the aforementioned orientation to the federal correctional system for all new staff.

Each intern accumulates four hours of vacation time (“annual leave”) and four hours of sick leave every two weeks, as well as paid leave for 10 federal holidays. Interns may request administrative leave for dissertation defense dates. Specific maternity and paternity policies are available in the Human Resource Management Manual. In general, interns who require maternity or paternity leave will be expected to first use all accrued hours of annual and sick leave. Additional time off will be determined on a case-by-case basis by the Warden. In the event of maternity or paternity leave, the Internship Program Coordinator will work closely with the intern to ensure all requirements for internship and clinical training hours are completed in a timely manner.

Employment Opportunities. The internship program in the BOP has produced many individuals who now hold psychologist or administrative positions in the system. In fact, many of our psychology staff began their careers as interns in the BOP. It is very common, although not guaranteed, for individuals who complete a doctoral internship in the BOP to move directly into a Staff Psychologist position.

Opportunities for advancement of psychologists in the BOP are extensive. Since there is an emphasis on successful reentry for inmates, treatment programs are opened each year. This necessitates the hiring of many psychologists as well as the promotion of psychologists to positions of increasing responsibility. In addition to advancement within Psychology Services, psychologists have advanced to the ranks of institution administration and beyond. Several BOP Wardens are former BOP psychologists. The current Director of the Bureau of Prisons, Dr. Kathleen Hawk-Sawyer, was a psychology intern and psychologist in the BOP.

Psychology staff members at FMC Devens are dedicated to assisting interns in subsequent job placement. Interns will provided access to vacancy announcements within the BOP as well as information about how to apply for positions. The Psychology Department can also assist interns in making connections with Chief Psychologists from other institutions who are hiring new staff members. Exploring employment options best suited for each intern and discussing strategies for obtaining employment occur throughout the training year.

The BOP is an equal employment opportunity employer. All applicants are considered without regard to race, religion, color, national origin, sex, status as a parent, political affiliation, age (with authorized exceptions) or any other non-merit factor. All BOP positions are classified as “sensitive.” Applicants must be United States citizens and must successfully complete a security clearance procedure that includes personnel interviews, a background investigation, a physical examination, and urinalysis drug screen. Offers are contingent on security clearance, and prospective candidates may be asked to complete this portion of the interview process prior to the Association of Psychology Postdoctoral and Internship Centers (APPIC) match date. Successful completion of the internship does not guarantee employment by the BOP.

Complete
APPLICATION PROCEDURES

**Requirements.** The doctoral internship program at FMC Devens is open to doctoral students enrolled in APA-accredited clinical and counseling psychology degree programs. Applicants must have completed three years of doctoral training and have successfully proposed their dissertation. By the time of application, applicants must have accrued a minimum of 500 intervention hours and 100 assessment hours, as documented on the AAPI. FMC Devens Psychology Services staff are dedicated to attracting, supporting, and retaining diverse psychology interns and staff.

Applicants for the Bureau's internship positions should be aware that they are applying for a position in a federal law enforcement agency. Therefore, selection entails not only demonstration of exceptional qualifications as an advanced graduate student / psychologist in training, but also suitability for work in a position of public trust. Bureau employees, including psychology interns, are held to a high standard of personal conduct and responsibility and are expected to be law-abiding citizens who can serve as strong role models for the inmate population.

Intern selection is based largely on breadth and quality of clinical experience, demonstrated academic achievement and consistency of interests with the training goals of the program, personal integrity, and maturity. Selections and the offer of positions at each site are made in strict accordance with the policies of APPIC’s Internship Matching Program. FMC Devens agrees to abide by the APPIC policy that no person at these training facilities will solicit, accept, or use any ranking-related information from any intern applicant.

**Application Procedures.** Early fall, graduate students from APA-accredited Clinical and Counseling Psychology schools interested in a doctoral psychology internship position at FMC Devens should complete each of the following steps:

**Step 1: AAPI Online**

Complete and upload the AAPI Online application for Psychology Internships available on the [APPIC Website](https://www.appic.org). Be sure to include all components, including a copy of your vitae, graduate transcripts, and three letters of reference. FMC Devens also requires that you upload a sanitized assessment report as part of your electronic application. Applicants are encouraged to submit materials as early as possible. Late applications will not be considered. The deadline for the 2020-2021 training year is **November 3, 2019**.

- Please note that each BOP training site considers AAPI Online materials separately. Therefore, all application materials should be uploaded for each site in which you are interested by their deadline.
Step 2: USAJOBS – DOJ Pathways Internship Program

After the AAPI Online application is reviewed by FMC Devens Psychology Services staff, selected applicants will be invited, via email, to complete a secondary application through the USAJOBS website. A separate process from the AAPI Online procedures, this step is a requirement of the Pathways Program (to which the BOP is bound). This email will be sent around mid-November.

Read the announcement on USAJOBS completely, especially the sections "Qualifications Required" and "Required Documents." Apply online and submit ALL required supporting documentation. Required Documents include:

a) **Resume** – in order to receive credit for experience contained in an uploaded resume, your employment history must be documented in month/year (MM/YYYY) format, reflecting starting date and ending date and include the number of hours worked per week. Failure to follow this format may result in disqualification.

b) **Transcript** – a transcript which includes the School Name, Student Name, Degree and Date Awarded. You should use a copy (official or unofficial) from your school’s registrar’s office.

c) **Verification of Completion of the AAPI** – examples of verification of completion of the AAPI include 1) a statement from the Training Director presiding over the doctoral program validating completion of the AAPI and matriculation at a clinical or counseling doctoral program or 2) a copy of confirmation of completion of the AAPI and registration for Match (i.e. proof of payment or APPIC Match ID number).

Applicants can contact the Bureau’s Consolidated Staffing Unit (CSU) located in Grand Prairie, Texas, for questions regarding their documentation and to inquire if all required documents were received. Contact information for CSU is on the vacancy announcement on the USAJOBS website.

During the USAJOBS application process, applicants must respond to a series of assessment questions. Your responses determine category placement (i.e., Best Qualified, Highly Qualified, Qualified). Additionally, Veterans Preference is applicable during this application process. After closure of the USAJOBS vacancy announcement, applicants in the Best Qualified category will be notified of their status by the CSU and forwarded to the internship site to be considered for an interview. Please note that all candidates (those being asked to interview and those no longer being considered) will receive a Notification of Results by December 15, 2019.

Please note assessment of eligibility through the USAJOBS application process plays a vital role in the certification of an applicant to one or all sites. You may be taken out of consideration for internship selection if found ineligible through this process.

Step 3: Interview Process

In early December, FMC Devens will be notified which applicants can be invited and scheduled for an on-site interview. We will contact those applicants via email to begin scheduling the interviews. At FMC Devens, interviews are typically scheduled in January.
As part of the interview process, applicants must satisfactorily pass a security clearance procedure that includes a computerized Core Values Assessment (CVA), a pre-employment interview, an integrity interview which addresses issues of personal conduct, and a panel interview in which you will be asked to respond to a number of scenarios that could arise in a correctional facility. These procedures are used to determine your qualifications for a position of public trust and are required of all applicants seeking employment with the Federal Bureau of Prisons. If you are applying to more than one BOP internship site, you may only have to complete this process once. Results of the security clearance procedures can be shared with other Bureau sites for your convenience. However, if you fail any portion of this security clearance at the site where your first interview occurs, you will no longer be considered at any of the other BOP sites.

Following clearance from Human Resources, applicants will interview with the internship program’s Training Committee, meet with the current class of interns, and receive a tour of the institution. Typically, the interview day begins around 8:00 AM and ends between 2:00 PM and 3:00 PM. Offers of positions are then made in strict accordance with the policies of the APPIC's Internship Matching Program.

**Additional Information.** If you have any questions regarding whether you would qualify for a federal position, you should seek further information from Human Resource Specialists at any of the sites of interest to you, to determine the advisability of continuing with the application process. Psychology staff are not able to advise you on these matters. Any questions you may have should be resolved prior to submitting your list for matching.

Offers of internship positions resulting from the computer match are strictly contingent upon satisfactory completion of the background investigation process, which includes a physical examination, a urinalysis drug screen, and a field investigation to verify that the information provided in interviews and on required forms is accurate. Failure to complete this process or a finding that an applicant is outside the guidelines for employment in a sensitive position would preclude participation in the program. Once hired, interns must comply with the Bureau's Program Statement on Standards of Employee Conduct.

*The foregoing is not intended to discourage applications, but to ensure that applicants are aware of all federal requirements imposed on them should they wish to pursue a Bureau of Prisons internship position.*
Internship Program Admissions

Date Program Tables are updated: July 22, 2019

Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program’s policies on intern selection and practicum and academic preparation requirements:

The overall aim of the doctoral internship program at FMC Devens is to produce entry-level professional psychologists who can also function competently in a correctional environment. Prior work experience in a correctional setting is not required, but training and experiences indicative of appropriate interest are important considerations in selections. FMC Devens Internship staff are dedicated to attracting, supporting, and retaining diverse psychology interns and staff.

Does the program require that applicants have received a minimum number of hours of the following at time of application? If Yes, indicate how many:

<table>
<thead>
<tr>
<th>Requirement</th>

</tr>
<tr>
<td>Total Direct Contact Assessment Hours</td>
<td>☑</td>
<td></td>
</tr>
</tbody>
</table>

Amount: 500

Amount: 100

Describe any other required minimum criteria used to screen applicants:

Applicants must be enrolled in APA accredited doctoral programs in clinical or counseling psychology. Eligible applicants must have successfully completed all doctoral course work by the beginning of the internship. Applicants need to have successfully proposed their dissertation. Successful completion of a security clearance procedure is required before the offer of an internship position can be considered final.
