Inmate Death at MDC Guaynabo

WASHINGTON, D.C.: On Wednesday, January 26, 2022, inmate Luis Felipe Miranda-Feliciano was evaluated by institution medical staff for complaints of left side weakness at the Metropolitan Detention Center (MDC) Guaynabo in Guaynabo, Puerto Rico. On the same day, he was transported to a local hospital where he tested positive for COVID-19.

On Thursday, February 3, 2022, Mr. Miranda-Feliciano's condition worsened and he was placed on a ventilator. Subsequently, Mr. Miranda-Feliciano, who had long-term, pre-existing medical conditions, which the Centers for Disease Control and Prevention (CDC) lists as risk factors for developing more severe COVID-19 disease, was pronounced deceased by hospital staff.

Mr. Miranda-Feliciano was a 62-year-old male who arrived at MDC Guaynabo on October 5, 2019, under pretrial status after being indicted for Possession of Firearms and Drugs.

MDC Guaynabo is an administrative security facility and currently houses 1,356 male and female offenders.

The Bureau of Prisons will continue to provide daily updates and information on actions related to COVID-19 at www.bop.gov/coronavirus/index.jsp.

Additional information about the Bureau of Prisons can be found at www.bop.gov.
