Inmate Death at FMC Rochester

WASHINGTON, D.C.: On Tuesday, February 8, 2022, inmate Glenn McGahan, tested positive for COVID-19 at the Federal Medical Center (FMC) Rochester in Rochester, Minnesota and was immediately placed in medical isolation. On Friday, February 18, 2022, Mr. McGahan, in accordance with the Centers for Disease Control and Prevention (CDC) guidelines, was converted to a status of recovered, following the completion of medical isolation, and presenting with no symptoms.

On Sunday, March 6, 2022, Mr. McGahan was found unresponsive by medical staff. Mr. McGahan, who had long-term, pre-existing medical conditions which the CDC lists as risk factors for developing more severe COVID-19 disease, was pronounced deceased by the medical physician. Following a review of the recently received autopsy report, it was determined Mr. McGahan's death was related to COVID-19.

Mr. McGahan was a 51-year-old male who was sentenced by the District of Vermont and committed under Title 18, 4243E, hospitalization and treatment sentence for Weapons Offenses. He had been in custody at FMC Rochester since July 9, 2015.

FMC Rochester is an administrative security facility and currently houses 581 male offenders.

The Bureau of Prisons will continue to provide daily updates and information on actions related to COVID-19 at www.bop.gov/coronavirus/index.jsp.
